## CARS->RENAULT-> MEGANE IV -> AUTO-DETECT

### Function for Renault Megane 4

In Renault Megane 4 vehicles odometers are produced by various manufacturers. DiagProg 4 supports all odometers that are mounted in this model. Without dismantling indicators it is impossible to detect odometer manufacturer.

To avoid mistakes when ordering a program for a particular manufacturer and to simplify module identification we have prepared a special program that will detect odometer manufacturer.

After using AUTO-DETECT function DiagProg4 will indicate program number needed to correct odometer or if it is already active required program will be launched .
