# SIMON TOLICH

## www.KeyProgtools.com Dealer Key 3 dump tool

When you launch the software for the first time, the below screen will appear:

Click on the settings button from the top menu top open the "Settings" screen

Transponder programmer	- ver: 1.0.7.3 - www.keyprogtools.com	
AutoSelect Open File Save	File Copy Paste Interface Show Log Settings A	bout
Brand and Model	Key Information	Other information
🐺 Porsche 🔻	Key 1: FF FF FF FF Not Used	Memory device:
	Key 2: FF FF FF FF Not Used	9S12XDP512 (1L15Y), 9S12XET512 (2M25J),
	🔏 General 🛛 🦂 Regional	
Cayenne (958)	Directory for saving files (Working folder):	ibers:
NHtPro Eeprom	C:/DealerKey3_107_ST Use automatic file saving to working folder	
		ey 1 🔻 Write Key
Event Log	Ok	Cancel Apply

### In the "Settings" screen:

- 1. please select the folder were you downloaded the software and the folder that you use to launch the software (Working folder)
- 2. Please Select "Use automatic file saving to working folder"

Any new updates that you receive you need to place in the same folder.

When you start the software for the first time, it will be non active. You would need to activate it by completing the above settings and by placing the license file in that you will receive in the same folder as well.

The same steps needs to be repeated, each time you will receive an upgrade for the license LC or Firmware FW.

After putting the LC and FW in the working folder, please start the software.

Click on the **"Interface"** button in the top menu then click on the **"Remote Updates"** tab and the screen will display 2 buttons:

- Firmware update
- License update

Press the 2 buttons so the software can make all the automatic updates.

When the software makes the proper updates for the License or Firmware, it will automatically delete them if they are no longer needed.
