

# Commander for BMW

## Electronic Unit Diagnostic

The **Commander for BMW** allows you to establish diagnostic session with each electronic control unit in the vehicles and to perform the following actions:

- Read and clear stored DTCs (diagnostic trouble codes)
- Read and clear history DTCs
- Read and clear shadow DTCs
- Added DTCs in 17 languages: English, German, French, Thai, Swedish, Italian, Spanish, Indonesian, Korean, Greek, Turkish, Chinese, Chinese traditional, Russian, Dutch, Portuguese, Japanese
- DTC conditions information (Odometer value, Timestamp, full engine status report for EDC17)
- Coding / Configuration of the unit
- Disable and Enable DTCs setting while diagnostic session
- Program part identification number
- Program User Information Memory of the electronic control unit (history from part programming)
- Check about part number, production date, producer and part specific information
